The Benefits of Having a Political Action Committee

The Ohio Aviation Association established a state-level Political Action Committee in early 2016. The OAA PAC has a Board of Directors and bylaws separate from the OAA. The OAA PAC has helped to advance our industry's needs from around the state through the General Assembly.

If you are still wondering whether to support the OAA PAC, here are some **benefits** to having and supporting the OAA PAC:

- **Provides an impactful way to support legislative champions**
A legislative champion is your voice in the state assembly. Providing financial support through OAA PAC contributions keeps your legislative champion fighting for your issues.
- **Gives association members a way to participate in the political process**
Individuals and eligible business who contribute to the OAA PAC have made a political decision to get involved with the issues which airports care about the most. An active, involved membership is a key part of OAA's success.
- **Raises the profile of the association**
Legislators take notice when an association has a PAC. Besides the funding mechanism, the OAA PAC demonstrates that we, as an industry, are committed to participating in the political process.
- **Increases effectiveness of your voice for the topics important to you**
Individuals and organizations are limited on how much they can contribute to a political candidate. By supporting the OAA PAC, airport and aviation supporters can increase contributions to candidates who support their issues.

Many of OAA PAC events provide opportunities to speak with our legislative champions. Watch our website (www.ohioaviation.org/political-action-committee) for up-to-date news and events.
